Healing is Our Revolution

Healing begins wherever you are. ROAR walks alongside community members every step of the journey.

Connection

Whether a community member is ready for treatment or not quite there yet, ROAR is here to provide peer support and outreach; in the community, for the community, by the community.

Peer Support: Helping you navigate community resources, services, and supports.

Community Outreach: ROAR meets people where they are and is here to support you every step of the way.

Recovery Journey

ROAR can support individuals at the beginning of their healing journey by assisting with:

Transportation: Helping an individual get to detox and other recovery-related appointments.

Detox: Assisting an individual in finding and accessing an available detox bed.

Treatment: Providing ongoing peer support before and after treatment to help an individual continue their recovery journey.

Growing Together

As individuals continue their healing journey, ROAR supports the transition from treatment to recovery through housing and community support.

Recovery Housing: Safe, supportive housing that promotes continued recovery through peer mentorship, community connection, and ongoing support.

Stable Housing: Assistance with finding and maintaining stable housing to support long-term wellness and independence.

Belonging Through Culture

Cultural Connection: Healing is a journey, and every person's path is unique. Healing is possible. Together, we grow. Healing is our revolution. No one needs to walk their healing journey alone.

Healing Circles: Build connection, belonging, and support through culturally grounded healing practices and shared community.
